

You're invited to a

COMMUNITY WORKSHOP!

JUNE 5, 2023 AT 6:00PM

Charlestown Fire Hall, 307 Market Street, Charlestown, MD 21914

The future flooding models have been completed for the Watershed Master Plan, and it's now time for us to try to understand the results, so we can begin to develop solutions that benefit entire neighborhoods, not just individual properties.

Please consider attending this workshop to give your feedback on shared solutions and priority projects.

We have posted videos of different flooding scenarios on our project website for reference. To view the videos, please go to www.charlestownmd.org/charlestown-watershed-master-plan-wmp/.
